

# Ahmad Zendebudi . Jarvis Consulting

I have always been passionate about solving challenging problems and building elegant structures. That is why I pursued computer science at both the bachelor's and master's levels and why I am working as a software developer at Jarvis. As a software developer, I get to unleash my creativity and logical thinking to craft algorithms and systems that are efficient, modular, and clean. I love what I do, and I am always eager to learn more and improve my skills. Software development is not only my passion but also my way of connecting with others who share the same enthusiasm. I enjoy exchanging ideas and insights with fellow software developers and working closely with them on the same projects to grow our skills and work as a well-oiled machine.
