

# Ahmad Zendebudi . Jarvis Consulting

I have always been passionate about solving challenging problems and building elegant structures. That is why I pursued computer science at both the bachelor's and master's levels and why I am working as a software developer at Jarvis. As a software developer, I get to unleash my creativity and logical thinking to craft code and systems that are efficient, modular, and clean. I love what I do, and I am always eager to learn more and improve my skills. Programming is not only my passion but also my way of connecting with others who share the same enthusiasm. I enjoy exchanging ideas and insights with fellow software developers and helping them grow their skills and confidence. This motivated me to organize and lead more than 20 Java programming workshops for high school students during two summer school events at Shiraz University of Technology, during my bachelor's studies.
